PROFESSIONAL SUMMARY

Digital Workplace Engineer with 5 years of hands-on experience across enterprise IT infrastructure, systems administration, and network operations for a multi-entity organization. Currently own Microsoft 365 tenant administration, Windows Server infrastructure (including server migration and DNS reconfiguration), and endpoint management via Microsoft Intune across Windows and macOS. Deliver network infrastructure planning (BOQ and implementation) and company-wide user support for both application and user-related issues. CCNA certified, with self-driven training in Azure, Windows Server, and ISO/IEC 27001. Building steadily toward IT leadership and infrastructure management roles, with a track record of taking on progressively larger ownership across successive positions.

KEY SKILLS

- Microsoft 365, Intune, Defender
- Windows Server, Active Directory (AD DS)
- PowerShell, Shell Scripting
- Network Security, VPN, Firewalls
- LAN, WAN, TCP/IP Networking
- VLAN Configuration, Subnetting
- Routers, Switches, Access Points, Ubiquiti UniFi
- DNS, DHCP, IP Address Management (IPAM)
- Patch Management, Patch Connect Plus
- Admin By Request (ABR)
- IT Asset Management, Inventory Management
- Helpdesk Support, End-User Technical Support
- Azure (VPN, Cloud Application Configuration), Entra ID Conditional Access
- Jira, Confluence, GitHub Organization Administration
- Network Infrastructure BOQ, Implementation Management

EXPERIENCE

Digital Workplace Engineer
Compliance Services Ltd. (WSD Group)
May 2024 - Present | Dhaka, Bangladesh

- Maintaining enterprise platform reliability across Windows Server infrastructure and endpoint environments (Windows/macOS).
- Owning full administration and engineering of the organization's Microsoft 365 tenant, covering Exchange Online, Teams, SharePoint, OneDrive, and Entra ID services.
- Configuring and maintaining Yealink video conferencing systems integrated with Microsoft Teams for enterprise meeting rooms.
- Configuring and managing Azure services, including VPN connectivity and cloud application configuration.
- Configuring Entra ID Conditional Access policies for Windows and macOS devices and Azure VPN access, supporting Zero Trust-aligned secure access.
- Administering collaboration and developer platforms, including Jira, Confluence, and the GitHub organization (access, permissions, and configuration).
- Administering Windows Server infrastructure including AD DS, DNS, and core services; troubleshooting authentication and access issues.
- Migrated and synced a new Windows Server with existing infrastructure; reconfigured DNS server and migrated all existing DNS records to the new server.
- Managing WSUS patch lifecycle: approvals, rings/scheduling, compliance monitoring, reporting, and remediation.
- Managing Patch Connect Plus for third-party application patch management, extending patching coverage beyond native WSUS to non-Microsoft software across the enterprise.
- Active Directory user/OU/security group management and RBAC-based access controls; resolving permission and inheritance issues.
- DNS management (zones/records) and troubleshooting name-resolution issues affecting applications and services.
- Managing secure access provisioning using SSH public/private key lifecycle for staff onboarding/offboarding.
- Deploying custom Intune configuration profiles and compliance policies for Windows and macOS endpoints.
- Fully rebuilt the macOS Intune enrollment and device-join policy from the ground up.
- Packaging and deploying Win32 and macOS apps through Intune; managing versions and controlled rollouts.
- Deploying WiFi configurations and endpoint hardening policies via Intune; enforcing security baselines.

- Creating custom PowerShell (Windows) and shell scripts (macOS) via Intune for security enforcement and automation.
- Administering Admin By Request and Windows organizational settings to enforce least privilege and governance.
- Performing Microsoft Defender root cause analysis for alerts/threat detections; implementing remediation and prevention actions.
- Supporting enterprise office network operations as a secondary network administrator; monitoring and maintaining network performance and uptime.
- Preparing network infrastructure Bills of Quantities (BOQ) and managing end-to-end implementation of enterprise network deployments.
- Managing and monitoring Ubiquiti UniFi network infrastructure including UniFi UDM gateway and Access Points for office wireless connectivity.
- Configuring enterprise WiFi networks using UniFi Controller including SSID management, VLAN segmentation, and access control policies.
- Monitoring network performance, device connectivity, and client usage through UniFi dashboards and alert systems.
- Troubleshooting LAN/WiFi connectivity issues, DHCP conflicts, gateway routing problems, and endpoint network access errors.
- Providing Level 1 (L1) and Level 2 (L2) helpdesk support to end-users for hardware, software, and network connectivity issues, prioritizing tickets based on business impact.
- Installing, configuring, and maintaining desktops, laptops, printers, and peripheral equipment for new hires and replacements.
- Maintaining IT asset and hardware inventory records, including issuance, returns, and equipment lifecycle tracking.
- Maintained IT hardware inventory and coordinated with vendors for procurement, repairs, and warranty claims.
- Providing Level 3 (L3) support through root-cause analysis and infrastructure-level remediation for complex network, server, and endpoint incidents escalated from L1/L2.
- Delivering Tier 2/3 support across Microsoft 365, Intune, and endpoint infrastructure for users company-wide; resolving critical endpoint issues quickly and prioritizing any application or user-related issue with a strong focus on user satisfaction.

Executive IT
OMC Footwear Ltd.
Oct 2023 - Apr 2024 | Dhaka, Bangladesh

- Managed Windows Servers and network devices supporting 150+ endpoints; ensured stable connectivity and IT support.
- Commissioned and completed installation of a factory-wide Cabinet Speaker, Horn Speaker, and Power Amplifier announcement system, with work completed and certified in accordance with relevant regulatory terms and conditions (Certificate of Completion issued).
- Automated user onboarding workflows for Active Directory and Microsoft 365 account provisioning.
- Developed an IoT monitoring application to track production line uptime and improve operational visibility.
- Operated and maintained Hikvision CCTV surveillance systems, including camera setup, DVR/NVR configuration, and footage retrieval for security monitoring.
- Provided Level 1 (L1) technical support and troubleshooting for hardware, software, and network connectivity issues, escalating complex problems to L2/L3 as needed.
- Maintained IT hardware inventory and coordinated with vendors for procurement, repairs, and warranty claims.

Executive IT
MBM Group
Mar 2022 - Sep 2023 | Dhaka, Bangladesh

- Provided systems/network administration and user support for 200+ endpoints in a production environment.
- Configured VPNs, firewalls, and Windows servers to support secure access and reliable operations.
- Managed Elastix IPPBX and remote access configurations; maintained uptime and user support.
- Delivered Level 1 (L1) and Level 2 (L2) technical support and troubleshooting for desktop hardware, printers, peripheral devices, and network connectivity issues.
- Maintained IT hardware inventory and coordinated with vendors for procurement, repairs, and warranty claims.

Flutter Application Trainer (Government ICT Project)
ArenaPhone - ICT Division, Skill Development for Mobile Game & App Project
Oct 2021 - Feb 2022 | Bangladesh

- Delivered cross-platform mobile app development training using Flutter/Dart covering UI design, state management, API integration, and Firebase basics.
- Provided project supervision and code review; guided students to deliver portfolio-ready apps and presentations.
- Mentored students on GitHub, CV/portfolio preparation, freelancing readiness, interview basics, and career planning.
- Trained cohorts from Begum Rokeya University (Rangpur) and Kazipur Monsur Ali College (Sirajganj) through structured modules and practical workshops.

PERSONAL PROJECTS & INFRASTRUCTURE

Azure Admin App: Windows desktop tool with a PowerShell-backed GUI for Azure AD and on-premise Active Directory administration.

Ayshra ERP: A production-ready, cross-platform ERP (Enterprise Resource Planning) and POS (Point of Sale) SaaS application built with Flutter and Firebase. Designed to manage inventory, sales, purchases, HR, fixed assets, and finances — all under a single multi-tenant platform. Deployed as containerized microservices on Kubernetes, with MongoDB as the backend database.

IT MCP Companion Dashboard: AI-powered IT assistant integrating Azure AD/Intune, SharePoint/OneDrive, GitHub, and Windows Server diagnostics.

WSD Productivity Dashboard: Daily briefing app with Microsoft SSO, live Jira/Calendar stats, and AI-powered task prioritization.

Local LLM Projects: Self-hosted, offline AI infrastructure using Docker, Kubernetes, and Llama-family models.

Portfolio: kobir-portfolio-2026.web.app

AWS EC2 instances for personal server administration and infrastructure practice.

DNS management and nameserver configuration for custom domains and subdomains.

WordPress hosting management with SSL, cPanel administration, and backup/restore operations.

EDUCATION

BSc in Information & Communication Engineering

East West University

2019 | CGPA: 2.43

HSC (Science)

Shahid Bulbul College

2012 | GPA: 4.80

SSC (Science)

Pabna Zilla School

2010 | GPA: 5.00

PROFESSIONAL TRAINING

AZ-104: Microsoft Azure Administrator

AZ-800 & AZ-802: Hands-On Certification Course with Sims

Mastering DNS on Windows Server

ISO/IEC 27001: Information Security Management System (ISMS)

Introduction to Service Management with ITIL 4

CCNA: Enterprise Networking, Security, and Automation

LANGUAGES

Bengali - Native

English - Fluent (Reading/Writing), Proficient Speaking

Hindi - Proficient Speaking

HOBBIES & INTERESTS

Football - Active Player: Passionate and competitive footballer with regular team play. Represented my team in the Inter-Software Company Football Tournament, competing against professionals from leading tech and software companies in Dhaka.

Team Sports & Community Leadership: Organized and led sports activities including cricket and football for student cohorts during the Government ICT training program, fostering teamwork, motivation, and camaraderie.

Home Networking & Lab Practice: Enjoys setting up home lab environments with routers, switches, and virtualization tools to practice network configuration and troubleshooting.

Coding & Personal Infrastructure Practice: Regularly codes and experiments with self-hosted infrastructure projects (Flutter/Firebase apps, Kubernetes, local AI environments) to sharpen development and systems skills outside of work.
