PROFESSIONAL SUMMARY

Digital Workplace Engineer with 5 years of total professional experience managing enterprise infrastructure, platform reliability, and secure endpoint environments. Specialized in Windows Server administration, Microsoft 365, Entra ID (Azure AD), Microsoft Intune, DNS services, WSUS and Patch Connect Plus patch lifecycle, and Microsoft Defender security operations. Experienced in PowerShell and shell scripting automation, enterprise network monitoring using Ubiquiti UniFi, and endpoint lifecycle management across Windows and macOS.

KEY SKILLS

Windows Server, Microsoft 365, Entra ID, Intune, AD DS, DNS, WSUS, Patch Connect Plus, Microsoft Defender, PowerShell, Shell Scripting, RBAC / MFA, Conditional Access, Exchange Online, Teams / SharePoint, Ubiquiti UniFi, VLAN / LAN, AWS EC2, Azure VM, Route 53, Microsoft Purview, GitHub Actions, Flutter Desktop, Dart

EXPERIENCE

Digital Workplace Engineer
Compliance Services Ltd. (WSD Group)
May 2024 - Present | Dhaka, Bangladesh

- Maintaining enterprise platform reliability across Windows Server infrastructure and endpoint environments (Windows/macOS).
- Administering Windows Server infrastructure including AD DS, DNS, and core services; troubleshooting authentication and access issues.
- Managing WSUS patch lifecycle: approvals, rings/scheduling, compliance monitoring, reporting, and remediation.
- Managing Patch Connect Plus for third-party application patch management, extending patching coverage beyond native WSUS to non-Microsoft software across the enterprise.
- Active Directory user/OU/security group management and RBAC-based access controls; resolving permission and inheritance issues.
- DNS management (zones/records) and troubleshooting name-resolution issues affecting applications and services.
- Managing Gitolite access using SSH public/private key lifecycle and secure developer onboarding/offboarding.
- Deploying custom Intune configuration profiles and compliance policies for Windows and macOS endpoints.
- Packaging and deploying Win32 and macOS apps through Intune; managing versions and controlled rollouts.
- Deploying WiFi configurations and endpoint hardening policies via Intune; enforcing security baselines.
- Creating custom PowerShell (Windows) and shell scripts (macOS) via Intune for security enforcement and automation.
- Administering Admin By Request and Windows organizational settings to enforce least privilege and governance.
- Performing Microsoft Defender root cause analysis for alerts/threat detections; implementing remediation and prevention actions.
- Supporting enterprise office network operations as a secondary network administrator; monitoring and maintaining network performance and uptime.
- Managing and monitoring Ubiquiti UniFi network infrastructure including UniFi UDM gateway and Access Points for office wireless connectivity.
- Configuring enterprise WiFi networks using UniFi Controller including SSID management, VLAN segmentation, and access control policies.
- Monitoring network performance, device connectivity, and client usage through UniFi dashboards and alert systems.
- Troubleshooting LAN/WiFi connectivity issues, DHCP conflicts, gateway routing problems, and endpoint network access errors.

Executive IT
OMC Footwear Ltd.
Oct 2023 - Apr 2024 | Dhaka, Bangladesh

- Managed Windows Servers and network devices supporting 150+ endpoints; ensured stable connectivity and IT support.
- Automated user onboarding workflows for Active Directory and Microsoft 365 account provisioning.
- Developed an IoT monitoring application to track production line uptime and improve operational visibility.

Executive IT
MBM Group
Mar 2022 - Sep 2023 | Dhaka, Bangladesh

- Provided systems/network administration and user support for 200+ endpoints in a production environment.
- Configured VPNs, firewalls, and Windows servers to support secure access and reliable operations.
- Managed Elastix IPPBX and remote access configurations; maintained uptime and user support.

Flutter Application Trainer (Government ICT Project)
ArenaPhone - ICT Division, Skill Development for Mobile Game & App Project
Oct 2021 - Feb 2022 | Bangladesh

- Delivered cross-platform mobile app development training using Flutter/Dart covering UI design, state management, API integration, and Firebase basics.
- Provided project supervision and code review; guided students to deliver portfolio-ready apps and presentations.
- Mentored students on GitHub, CV/portfolio preparation, freelancing readiness, interview basics, and career planning.
- Trained cohorts from Begum Rokeya University (Rangpur) and Kazipur Monsur Ali College (Sirajganj) through structured modules and practical workshops.

NOTABLE PROJECTS

Azure Admin App - Windows Desktop AD Management Tool

- Built a Windows desktop Flutter app providing a PowerShell-backed GUI for Azure AD and on-premise Active Directory administration.
- Supported bulk CSV workflows for user creation, group/DL assignment, contact import, and distribution list management.
- Stack: Flutter 3.x, Dart, PowerShell, Windows Desktop, file_picker, process_run, msal_flutter.

IT MCP Companion Dashboard - AI-Powered IT Assistant

- Flutter desktop app with a local Dart MCP server (JSON-RPC 2.0 via stdio) connected to Google Gemini 2.5 Pro for natural-language IT operations.
- Covers Azure AD/Intune, SharePoint/OneDrive, GitHub, Windows Server diagnostics, Gmail, and Calendar. Compatible with Claude Desktop & Cursor.
- Stack: Flutter Desktop, Dart MCP server, google_generative_ai, googleapis, googleapis_auth, flutter_dotenv.

WSD Productivity Dashboard - AI-Powered Daily Briefing App

- Built entirely from scratch and deployed live for WSD's internal AI Challenge Workshop - placed in the top results (AI-assisted development).
- Cross-platform Flutter app with Microsoft SSO (MSAL), live Jira/Calendar/email stats, Claude-powered priority briefing, per-task completion likelihood, Teams chat quick-reply, BambooHR leave banner, and FCM push notifications.
- Stack: Flutter, Dart, Azure Functions, Microsoft Graph API, Claude API, Firebase FCM, Hive, MSAL Flutter.

Local LLM Projects - Self-Hosted AI Infrastructure

- Built a fully offline, self-hosted AI stack running Llama-family models locally with no cloud API dependency.
- Containerized model-serving with Docker and orchestrated as a small Kubernetes cluster; used WSL2 as the Linux dev environment on Windows.
- Wired a Flutter client to the local-only LLM backend to explore private, offline-first AI features using the same UI patterns as the projects above.
- Stack: Docker, Kubernetes, Llama, WSL2, Flutter, Dart.

PERSONAL INFRASTRUCTURE & CLOUD

AWS EC2 instances for personal app hosting and server admin practice.

DNS management and nameserver configuration for custom domains and subdomains.

Custom Laravel apps on self-managed LAMP environments.

WordPress hosting with SSL, cPanel, backup/restore, and virtual host configuration.

EDUCATION

BSc in Information & Communication Engineering

East West University
2019 | CGPA: 2.43

HSC (Science)

Shahid Bulbul College
2012 | GPA: 4.80

SSC (Science)

Pabna Zilla School
2010 | GPA: 5.00

PROFESSIONAL TRAINING & CERTIFICATIONS

AZ-104: Microsoft Azure Administrator

AZ-800: Windows Server Hybrid Infrastructure

Mastering DNS on Windows Server

ISO/IEC 27001:2022

CCNA (NACTAR)

Flutter Development (Government Training Program)

LANGUAGES

Bengali - Native

English - Fluent (Reading/Writing), Proficient Speaking

Hindi - Proficient Speaking

HOBBIES & INTERESTS

Football - Active Player: Passionate and competitive footballer with regular team play. Represented my team in the Inter-Software Company Football Tournament, competing against professionals from leading tech and software companies in Dhaka.

Team Sports & Community Leadership: Organized and led sports activities including cricket and football for student cohorts during the Government ICT training program, fostering teamwork, motivation, and camaraderie.

Personal Tech Projects: Continuously building desktop tools and infrastructure automation projects in personal time - from AI-powered IT dashboards to AD management apps.

Continuous Learning: Actively pursuing Azure, Windows Server, and security certifications on Udemy and other platforms to stay ahead of evolving enterprise technology trends.
